

STEPS TO INSTALL SOD IN THE DESERT:

1. Pull all weeds & dead grass
2. Rototill 3-4 bags of mulch -AND- 40 pounds of gypsum for every 1000 square feet of yard area
3. Rake into a smooth, level grade
4. Working as quickly as possible, install sod: start along one edge and stagger rows so seams don't line up
5. Lightly water newly installed sod
6. Use a Lawn Roller to tamp the sod down and even everything out
7. Water immediately
